

Nguyen Quang Thuan INTERN REACT/ NODEJS

PROFILE -

- 0388.254.252
- http://thuannguyen.asia
- thuan13112003@gmail.com
- facebook.com/thuan.ngt
- 295 Bach mai, Ha noi

SKILLS -

- BACKEND: TYPESCRIPT, NODEJS, EXPRESSJS, NESTJS
- FRONTEND: HTML, CSS, REACTJS, REDUX, ANTD
- DATABASE: MYSQL, SQL SERVER, MONGODB, REDIS
 - Docker, Deploy VPS, CI/CD, Github Action
 - · RabbitMQ
 - · JWT, Passport, OAuth2
 - Toeic: 600+

INTERESTS

Teambuilding, playing sports, especially chess

OBJECTIVE

Accumulate more experience, handle work effectively and quickly. Ready to learn, not afraid of difficulties.

EDUCATION -

COMPUTER ENGINEERING

August 2021 - July 2025

Hanoi University of Science and Technology (HUST)

CPA: 3.2

WORK EXPERIENCE

BACKEND DEVELOPER

Aug 2024 - Dec 2024

Kiaisoft

Worked on several projects using Node.js (Express.js), responsible for developing RESTful APIs and setting up automated CI/CD deployment for the team. Additionally, I have experience using frontend frameworks like React.js and Redux.

PROJECTS

DEVELOPER

BOOK MANAGEMENT SYSTEM

Nov 2024 - Dec 2024

Link Project Internal Project

Your team size: 2

Technology description

- Backend: Developed using Express.js with TypeScript for type safety and modular architecture.
- Database: MySQL with Sequelize ORM for efficient database management and query handling.
- Authentication: Secured with JWT for user authentication and OAuth2 for Google login integration.
- Containerization: Utilizes Docker to containerize both the backend and MySQL database, ensuring consistency across development, testing, and production environments.

Your position in project

Back End Developer

DEVELOPER

CLONE TWITTER

Jan 2024 - May 2024

Link Project : https://github.com/ThuanNqt/Twitter

Your team size :1

Technology description

- Backend: I used TypeScript with the Express.js framework to build RESTful APIs. I am responsible for the server-side code. Implemented Socket.io for real-time messaging.
- Database: I used MongoDB.
- Authentication and Authorization: Implemented JWT for user authentication and authorization within the system. Deployed OAuth2 to

allow third-party applications access without sharing user passwords. \\

- File Storage: Utilized AWS S3 services for storing images and videos.
- Deployment: Implemented Docker for containerization and set up automated CI/CD deployment on a VPS with Vultr.
